ABOUT

A passionate software developer specializing in web technologies. With a background in Computer Engineering from MEF University, currently works at Doğuş Technology. Has experience integrating building websites, integrating APIs, AI technologies, and working with various programming languages. A fast learner, team player, and perfectionist, always eager to explore new technologies and improve his skills.

Examples of Projects:

- Portfolio and DevFest event websites using Next.js and Strapi.
- Professional websites including Doğuş Group and RMK Museums.
- Strapi CMS integration into Hybee.co website.

All projects are available on egekaan.dev/projects.
